

WE ARE HIRING!

Motion Control Engineering (MCE) has enjoyed a history of innovation, rapid growth and success. One of the early pioneers in the development of non-proprietary microprocessor-based elevator controls, MCE is now the largest and most successful independent elevator control manufacturer in the world. In 2012, MCE became part of Nidec Corporation which is the world's leading manufacturer of motors ranging from small precision to ultra-size motors. MCE's elevator control products move people daily in tens of thousands of buildings around the world. Some of the most notable and recognizable buildings include the Statue of Liberty, The Washington Monument, The US Capitol Building and The US Supreme Court Building. MCE's elevator control products also exist in thousands of buildings in universities, hospitals, shopping malls, housing projects, office buildings, etc. MCE is also the leading company in Nidec's Global Elevator Solutions Group which serves the markets outside North America.

The key to our success is our people, technology and quality. MCE's people have a variety of educational achievement levels and work experiences, and represent a broad cultural diversity.

The opportunities you will find at MCE are limited only by your desire to grow and succeed.
